Skills

Artificial Intelligence | Machine Learning Developer | Prompt Engineering | Python | App Development (Flutter, Firebase) | Web: HTML | Firebase

Work Experience

Freelance & Self-Employed Developer

March 2025 – Present

- Developed mobile apps using Flutter and Dart for iOS and Android.
- Built AI-powered solutions and automation tools.
- Managed client communication, project planning, and delivery.
- Worked on prompt engineering for AI projects.

Education

Bachelor in Software Engineering (Ongoing)

Completed 2 Semesters | Abaysin University, Peshawar

- Focused on App Development and Artificial Intelligence.

Projects

AI Desktop Assistant – Python, OpenAI

- Developed a full-featured AI-powered desktop assistant capable of understanding natural language and responding like a human.
- Automates daily tasks, answers questions, and interacts with users using advanced AI techniques.

AI Chatbot – Python, OpenAI

- Created an intelligent chatbot that can converse naturally, solve queries, and assist users effectively.
- Focused on prompt engineering to improve AI responses and human-like interaction.

Tailor Management App – Flutter, Firebase

- Built and managed a custom mobile app for real clients to handle customer registration, order tracking, billing, and measurements.
- Implemented real-time updates, improved UI/UX, and maintained client feedback for continuous improvements.

Cash Calculation App – Flutter

- Developed a user-friendly app for efficient cash management for clients.
- Handled real-time calculations, updates, and client requirements, ensuring smooth day-to-day financial operations.

Positions of Responsibility

- **Project Manager & Developer**

Oversaw full project lifecycle from planning to deployment for real-client apps.

- **Client Coordination:**

Communicated with clients to gather requirements, provide updates, and implement feedback.

- **Development & Implementation:**

Designed, coded, and maintained apps including Tailor Management and Cash Calculation.

- **AI Project Leadership:**

Leading AI Chatbot and AI Desktop Assistant development, ensuring high-quality, functional solutions.

- **Problem Solving & Updates:**

Identified issues, debugged apps, and applied improvements to meet client needs.
